

# The HeadRoom Micro System

for use with your Micro Amp & Hard drive player

- HeadRoom Micro Amp
- HeadRoom Micro DAC
- HeadRoom Micro Bag
- HeadRoom Micro Strap
- Your Portable Hard Drive Player

## Setting up your Micro Strap & Micro Bag

For use with the Micro Amp

1. Position your strap with the lounge directly on top of your Micro Amp. Make sure the lounge's metal hinge is sitting directly above the front of the amp.

2. Pick up the amp, and wrap the strap around the bottom of the amp. Loop the end of the strap through the metal bar on the other end of the strap.

3. Adjust the strap on the amp to ensure the lounge is still centered directly on top of the amp. Once it is centered, secure the strap to the amp by closing the strap. The strap will adhere tightly to itself with velcro.

4. The strap is now ready for your portable player. You can raise the lounge on the strap by pulling it upwards. Raise the metal bar underneath to adjust your lounge at varying heights.

5. After attaching velcoins to your portable player, simply place it on the lounge and enjoy easy viewing and adjustment all the while securing it to your Micro Amp.

6. Connect your player to the Micro Amp using a mini-mini cable from the headphone out of your player to the line input of the Micro amp.

## Securing your Micro Strap in the Micro Bag

Now, you have your Micro Amp and portable player secured together with the Micro, and you're ready to take it with you. It only takes a moment to hit the road running with your Micro System, and best of all, you don't even have to stop your tunes to make it happen.

7. Simply place your strapped gear in the bag with the controls facing towards the front of the bag. The Micro Strap has Velcro on the bottom and will instantly adhere to the bag to keep your gear firmly in place.

8. Now lower the lounge by lowering the bottom metal bar, and securing it into the base. Zip up your Micro Bag, and let the headphone cable hang out of where the dual zippers join. Sling it over your shoulder or secure it to your belt, and go!
